GlobaLeaks: The Idea

Build a usable platform to support secure
and anonymous whistleblowing.

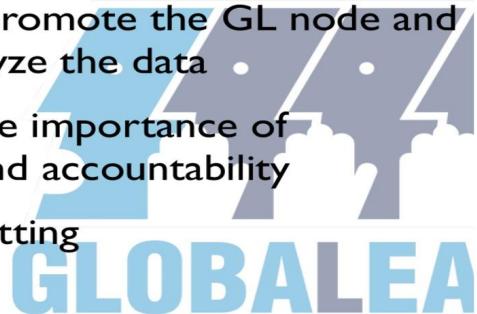

Worldwide.

2011's GlobaLeaks vision

Transparency Activism

- NGO and informal activism organisations
- **They** will promote the GL node
- They will only promote the GL node and others will analyze the data
- Advocacy on the importance of Transparency and accountability
- Corruption spotting

Der 4, 2011

4, 2011

Media

- Media outlets, Magazine and Journalism associations can setup a WB interface
- Collects Anonymous report by default
- Two real world use cases

Public Agencies

- Internal and **external** public WB services
- **USA IRS, US SEC, EU Antitrust**
- Involve citizens into spotting tax evasion, market manipulation, corruption, malpractice in health and environment

Private Corporations

- Important tool to be integrated within the corporate organizational model
 - Typically managed by internal audit
 - Accountability mandated by the law
 - Sarbanes-Oxley Act (USA)
 - Dlgs 231 (Italy)

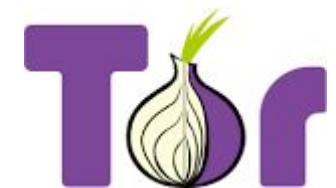

10

GlobaLeaks Tech

Backend: Python
(Twisted / Storm / Tor / python-cryptography...)

Frontend: JS
(AngularJS, Bootstrap, OpenPGP.js...)

State of the Research

Designed for usability, GlobaLeaks enabled hundreds of NGOs to create their own secure whistleblowing platform.

Current implementation now targets enabling those NGOs to serve each several partner organizations or groups.

For this reason GlobaLeaks now offers:

- A multi-site (multi-tenancy) implementation;
- Integration with Let'sEncrypt to ease HTTPS setup;
- Full features list at:
<http://docs.globaleaks.org/en/latest/Features.html>

Read more about the documentation at:

<http://docs.globaleaks.org/en/latest/>

Ok, ma alla fine chi lo usa questo software?

Alexis Mera emails reveal manipulation of legal proceedings in the Constitutional Court

The following emails, exchanged between Alexis Mera, then Legal Secretary of the Presidency, and Carlos Cortaza, lawyer of the former Ecuadorian Customs Corporation, show how both coordinated actions to interfere in the judicial proceedings against businessman Welmer Quezada Neira.

Quezada was accused in several instances of customs fraud for his import and export business, most of which were filed in the courts of the North Criminal Judicial Unit of Guayaquil. However, the dismissals were dismissed by the Constitutional Court, by Ruth Seni Pinoargote, one of the judges proposed by the Executive. In addition, in that same sentence the Constitutional Court also asked the Judicial Council to investigate the conduct of the judges of the Chamber that ordered the dismissal. Soon these judges were dismissed.

In this context, the content of these emails can be serious, since the lawyer of the CAE explicitly thanks Mera for its role in achieving those resolutions. 'I do not want to miss the opportunity to thank you for all the help in the WQ issue (Welmer Quezada) with the resolutions obtained from the CC (Constitutional Court) we are going to reactivate all the cases that are possible here in Gye' (sic), Cortaza said in 2013, when the strategy was taking shape. In addition, on September 19, 2013, Cortaza reported having taken action to move the cases from Quito to Guayaquil: 'I already returned the cases of UIO and tomorrow I pass it to the criminal court of Guayas to order another preventive detention to WQ and company'. It is necessary

[Domov](#) » Jak oznámit korupci?

Jak oznámit korupci?

[Přeskočit přímo k oznámení](#)

Oznamujte bezpečně pomocí rozhraní GlobaLeaks!

GlobaLeaks je software, který i méně technicky zdatným osobám umožnuje podat oznamení o korupci takovým způsobem, aby bylo možné zaručit jejich anonymitu a ochránit obsah jejich sdělení za použití moderních kryptografických nástrojů. Nástroj umožňuje dvě varianty oznamení – **důvěrné** a **via Tor** (o rozdílu mezi podáním si přečtěte [níže na stránce](#)).

Oživení je od července 2015 jediným poskytovatelem GlobaLeaks v ČR.

Příjemci Vašeho oznamení budou vždy respektovat Vaši anonymitu, ať jste již vybrali variantu podání důvěrného oznamení nebo via Tor, který zajišťuje jak Vaši anonymitu, tak chrání obsah Vašeho sdělení v kyberprostoru. V případě, že použijete podání via Tor, nemůžeme ovšem zaručit anonymitu Vašeho

**Oznamte korupční jednání
bezpečně a anonymně pomocí
zabezpečeného rozhraní
GlobaLeaks.**

[Chci oznámit nekalost](#)

GlobaLeaks je open source projekt zaměřený na vytvoření platformy pro bezpečné a anonymní oznamování nekalých jednání

**K nekalému jednání dochází
mnohem častěji, než je
medializováno. Dokazují to kauzy
z naší právní poradny:**

Tor Project

<https://blog.torproject.org/italian-anti-corruption-authority-anacadopts-onion-services>

Millions of people use Tor every day to evade surveillance and censorship. Tor's security and privacy protections enable activists to mobilize, journalists to report, and ordinary people to access blocked resources and avoid tracking.

Whistleblowers, those brave individuals who report illicit activity, also depend on Tor to protect their identities when they come forward.

Additional Terms AGPL 3.0 7/b

ADDITIONAL TERMS PURSUANT TO SECTION 7(b) OF AGPLv3

Pursuant to Section 7(b) of the AGPLv3, we require the preservation of the legal notices, copyright notices and author attributions in the program and in its documentation or in the Appropriate Legal Notices displayed by works containing it.

The Program displays such notices in each user interface screen with an author attribution that includes "Powered by GlobaLeaks".

For works containing the Program or any covered work, each interactive user interface must include a prominent and conveniently accessible feature for the display of Appropriate Legal Notices. This display must include author attributions and copyright notices as found in the Program. This display of these author attributions must be convenient for a user wishing to browse credits, shown in a manner separate and distinct from license texts, and commensurately prominent with respect to other author attributions.

To the extent that it is technically feasible and not obtrusive, the graphical form of these author attributions, such as a "Powered by GlobaLeaks" logo, must be preserved; otherwise, a textual equivalent is permitted. When users click on the "Powered by GlobaLeaks" logo it must direct them back to the <https://www.globaleaks.org> website.

We require the Appropriate Legal Notices to be preserved clearly visible with size of the fonts and icons proportionate to the user interface being used.

Any party that wishes to remove the author attribution from the user interfaces is required to obtain written consent from Whistleblowing Solutions I.S. SRL.

Roadmap Project-Driven + Supporto per Need-Finding

Lo sviluppo di un progetto di software libero deve tenere di conto sia le esigenze degli sviluppatori ma soprattutto le esigenze degli.... END USERS!

La roadmap di “lungo periodo” rappresenta la vision verso cui tendere, ma il piano operativo deve essere orientato al mercato e agli utilizzatori finali:

Supporto tecnico non significa risolvere problemi ma comprendere esigenze che servono a influenzare la roadmap di sviluppo software.

Obiettivi finanziari chiari

Definire gli obiettivi finanziari è importante per chiarire al “mercato” la non volontà di “arricchirsi” con il progetto.

Il progetto GlobaLeaks ha l’obiettivo di 250.000 euro/anno entro il 2020.

L’obiettivo è comunicato a tutti i “potenziali clienti” rendendo chiaro che il loro progetto è un contributo affinché il software sia manutenuto e libero per tutti nel tempo.

Grazie mille

Domande?

THANK YOU FOR THE ATTENTION
